

# Safe & Successful Decommissioning

Safe and successful decommissioning has been going on since 1960 at more than 70 locations throughout the United States. **Below are a few locations:**

# Safe & Successful

NASA will draw on the knowledge and expertise gained from these other decommissioning projects nationwide to perform a thorough and safe cleanup of the closed Reactor Facility at Plum Brook Station.

All decommissioning projects - whether completed or ongoing - have been reviewed and overseen by the Nuclear Regulatory Commission. These include projects both smaller and larger than the closed Reactor Facility at NASA Plum Brook Station.
